Clues

1 and 5 are an intersecting Pair on D4 and F4 and also G6 and H6. This opens up another intersecting Pair, # 3 and 5, which places these on I7 and I9.

B6 is a Niner and B8 and also G1. There is a Niner on C8 too.

It is easy to miss one of these Niners such as that on B6 that really unlocks the puzzle. In doing so initially the hunt was on for complex symmetry that does exist. Niners are simpler!
