### Clues

A quick deduction tour concludes that F9 must be 8. Row 4 in segment 4 contains an 8 and row 6 in segment 6. This means an 8 in row 5 of segment 5. Both 8s in segments 2 and 5 must be on the D and E files, leaving F8 as the only square.

Deduction comes into play too regarding the position of 1 on F7. It cannot be on C1 as this would leave A1 as a 1. There is a pair in segment 2 arising from segments 1 and 3. This also helps.
